PROFILE

Junior Web Specialist with experience in Drupal-based web development, frontend technologies, and content management. Skilled in HTML, CSS, JavaScript, PHP, and jQuery, with hands-on experience in customizing Drupal themes, modules, and backend configurations. Proficient in testing and debugging using Selenium and PHPUnit, ensuring accessibility compliance with WCAG 2.2. Experienced in Google Analytics, SEO optimization, and performance improvements through Drupal configurations and server optimizations. Familiar with staging environments and version control using Git, ensuring smooth deployments and content updates.

EDUCATION

University of Illinois at Springfield | Springfield, Illinois
Master of Science in Computer Science

Graduated: May 2024

Rajiv Gandhi Proudhyogiki Vishwavidyalaya | Indore, India
Bachelor of Science in Computer Science

Graduated: Jun 2022

SKILLS

Web Development & CMS:	HTML5, CSS3, JavaScript, PHP, jQuery, Drupal CMS (Theme Customization, Module Integration, Content Management)
Backend Development:	Node.js (Express.js), PHP (Drupal-based backend functionalities)
Database Management:	PostgreSQL, MySQL (Query structuring, performance optimization)
Testing & Debugging:	Selenium, PHPUnit (UI/UX testing, accessibility compliance)
Performance Optimization:	Drupal configurations, basic server load balancing, WCAG 2.2 compliance
Analytics & SEO:	Google Analytics, Google Ads, SEO optimization
Version Control & Deployment:	Git, staging environment management

PROFESSIONAL EXPERIENCE

University Of Illinois at Springfield | Springfield, Illinois
Junior Web Specialist

July 2023 - May 2024

- Developed and maintained webpages using HTML, CSS, JavaScript, PHP, and jQuery within Drupal CMS, ensuring responsive and accessible designs.
- Customized Drupal themes and templates, updating content, styles, and layouts based on project requirements.
- Implemented PHP-based functionality in Drupal, enhancing content management workflows and minor backend features.
- Optimized site performance by fine-tuning Drupal configurations and assisting with basic server load-balancing tasks.
- Assisted in testing and debugging using Selenium and PHPUnit, identifying UI/UX issues and fixing minor bugs.
- Ensured compliance with WCAG accessibility guidelines, improving usability for a diverse audience.
- Monitored website traffic and engagement using Google Analytics and Google Ads, providing insights for content optimization.
- Developed features and optimized performance for the UIS Mobile App using React Native, ensuring a seamless user experience across iOS and Android.
- Integrated RESTful APIs into the mobile app, enabling real-time data retrieval and enhancing functionality.
- Debugged and fixed UI/UX issues in the mobile application, improving app stability and responsiveness.
- Managed staging environments for testing updates before deployment to production, ensuring smooth content releases.

PROJECTS

Dmart Sales Prediction Software ([GitHub](#))

Sep 2023 - Nov 2023

- Developed a basic machine learning model using Scikit-learn to predict sales trends based on historical data.
- Processed and cleaned raw sales data using Pandas and NumPy for better model accuracy.
- Stored and retrieved structured sales data using PostgreSQL for efficient query performance.
- Ran and tested the model locally without cloud deployment.

Crime Detection Software

Jan 2022 - Mar 2022

- Developed a real-time image-based crime detection system using TensorFlow to classify whether a person in an image is a criminal.
- Integrated camera feed processing to capture images and analyze them for criminal identification.
- Implemented OpenCV for facial recognition and image preprocessing, improving detection accuracy.
- Logged detection events with camera location and unique identification codes for tracking and analysis.

Smart Restaurants Project

Sep 2021 - Dec 2021

- Designed and developed a restaurant ordering system with a user-friendly React.js interface for browsing menu items and adding to cart.
- Built a backend API using Node.js (Express.js) to handle order management and data processing.
- Implemented a dynamic cart system where users can select items, adjust quantities, and view real-time pricing.
- Developed an order tracking system, allowing restaurant staff to update order status and manage inventory.

CERTIFICATE

- DevOps Certificate by PagerDuty
- Apple Search Ads Certified
